

List of Problems to be solved in sketch book

Sheet No. 1 (Projection of Lines & Planes)

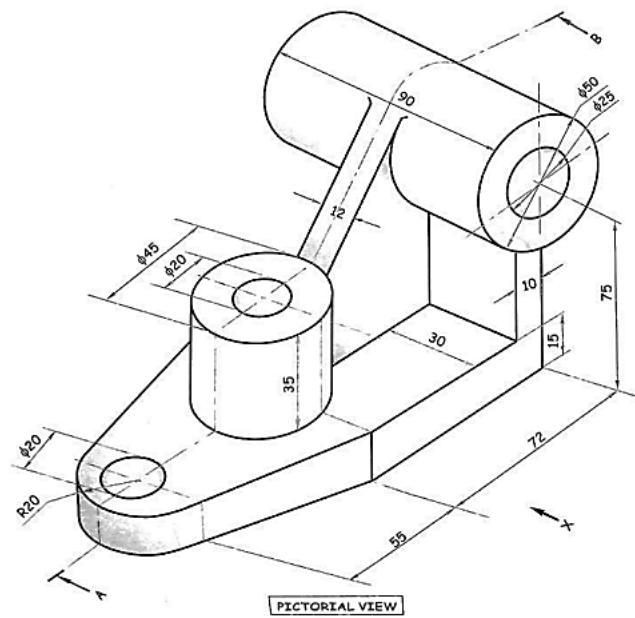

CO₁: Projection of lines and planes.

1. A straight line AB of true length 100 mm has its end A 20 mm above HP and 30 mm in front of VP. The top view of the line is 80 mm and front view is 70 mm. Draw the projections (TV and FV) of the line AB and obtain the true inclinations of the line AB with HP and VP. Point B is in first quadrant
2. The FV of line AB is 60 mm long and is inclined at 60° to XY line. The end A is 12 mm above HP and 25 mm in front of VP. Draw projections of line if it is inclined at 45° to HP. Find the true length and true inclination of line with VP. Line AB lies in first quadrant.
3. A pentagonal plate of 25 mm side has one of its sides in HP. Draw its projections if its surface is inclined at 45° to the HP..
4. A regular hexagonal lamina of side 25 mm is resting in VP on one of its corner. Draw the projections if diagonal passing through that corner makes an angle of 30° to the VP.

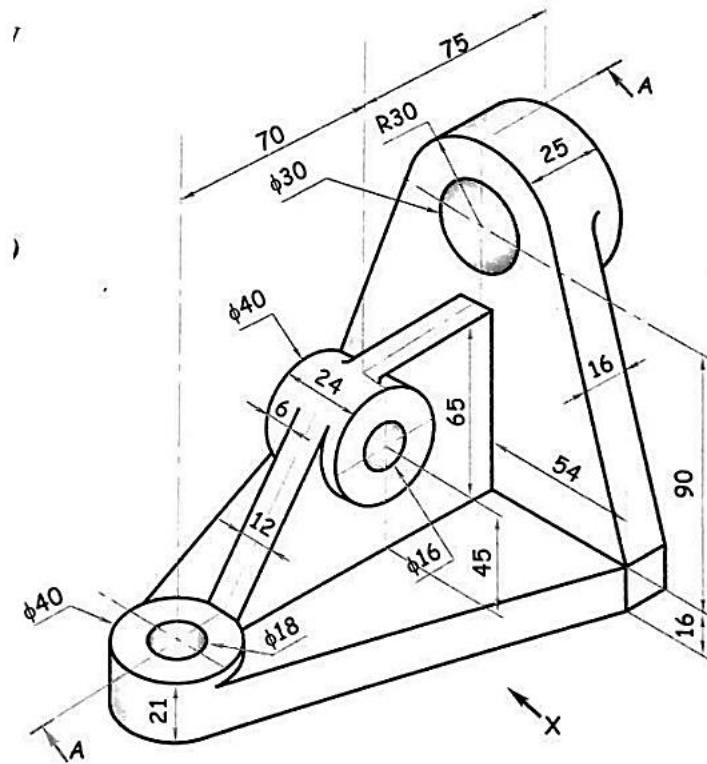

Sheet No. 2 (Orthographic and Sectional Orthographic Projections)

CO₂: Orthographic and sectional views of any 3D object.

1. Figure shows pictorial view of object. Draw the following views using the first angle method of projections, a) Plan b) Elevation in the direction of arrow X c) Left Hand Side View.

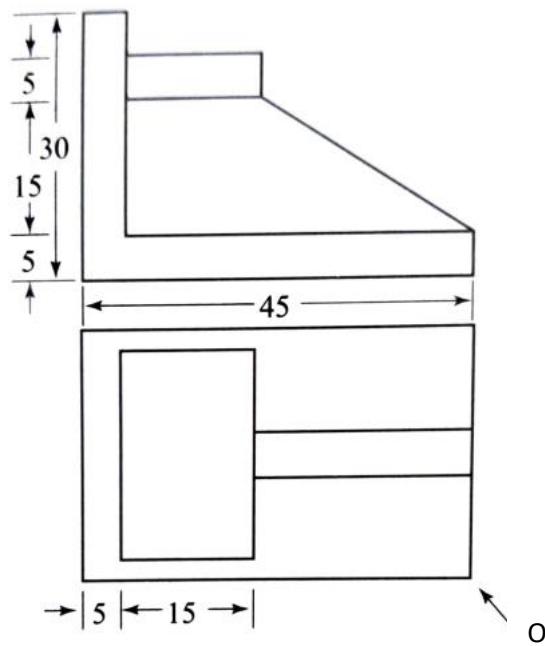

2. Figure shows pictorial view of Object. Draw using first angle method of projections,
 i) Sectional Front view along A-A; ii) Top View; iii) LHSV.

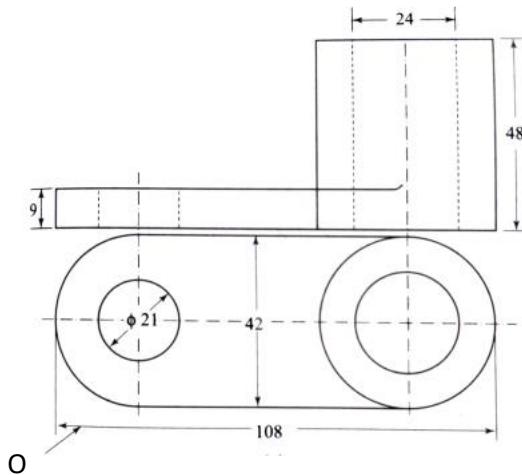

Sheet No. 3 (Isometric drawing)

CO 3: Isometric drawing.

1. Figure shows the front view and Top view of an object. Draw its isometric Drawing about an origin ‘O’.

2. Figure shows the Front view and Top View of an object. Draw its isometric projection about an origin ‘O’.

Sheet No. 4 (Projection of Solids)

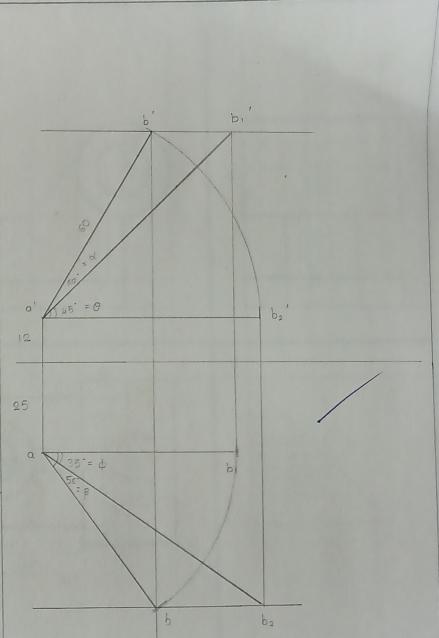

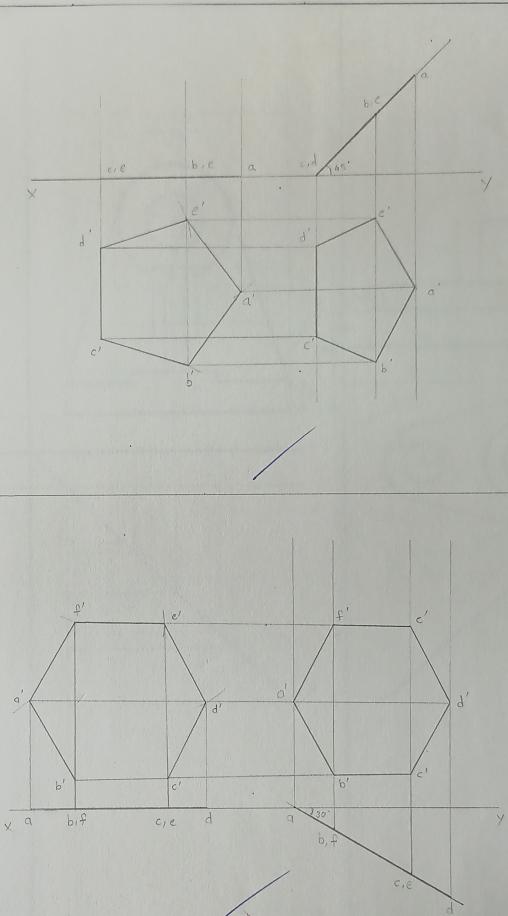

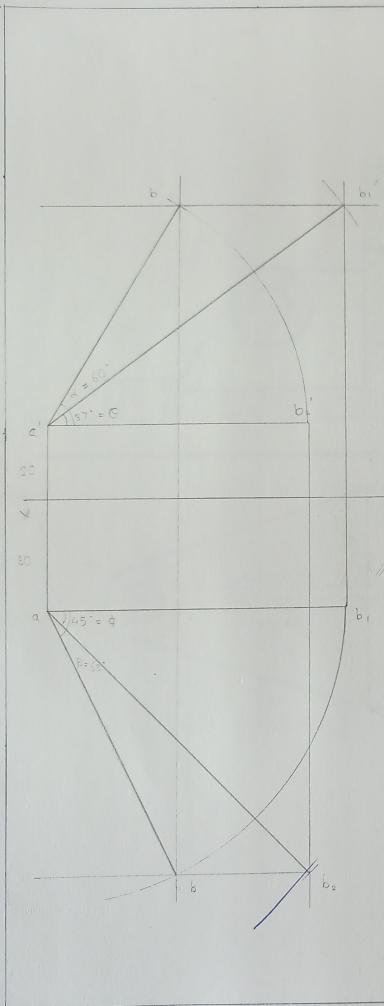

CO₄: Projection of regular solids.

1. A cylinder of base diameter 50 mm and axis 70 mm has a point of its base circle in the VP. Its axis is inclined at 30° to the VP. Draw its projections.
2. A square prism, side of base 40mm and length of axis 70mm, has an edge of its base in the VP. The axis is making an angle of 55° . Draw the projections of solid.

Sheet No. 5(Section of Solids and development)

CO₅: Section and lateral development of regular solids.

1. A hexagonal pyramid of 25 mm edges of base and 65 mm height is resting on its base on HP with two sides of base parallel to the VP. It is cut by an auxiliary inclined plane inclined at 45° to the HP intersecting axis at a point 22 mm above base. Draw elevation, sectional plan and the true shape of section.
2. A cone of base 70 mm diameter and axis 90 mm long is resting on its base on HP. It is cut by a section plane perpendicular to VP and parallel to and 15 mm away from one of its end generators. Draw the front view, sectional top view and the true shape of a section. Also draw the development of lateral surface.

All Dimensions are in millimeter (mm)
